

**REMANUFACTURING  
SERVICES FOR EV CHARGERS  
AND SOLAR INVERTERS**

Our highly skilled technicians and engineers in the TVH's repair centers possess strong mechanical and electrical engineering knowledge, allowing them to quickly diagnose and solve complex issues.

We prioritize their continued education and provide regular coaching and training opportunities to keep them up-to-date with the latest technologies and techniques.

# WHY DO WE REMANUFACTURE?

## 1. SAVE MONEY.

Our high-end quality remanufactured parts are beneficial in **reducing costs**. With our reconditioned parts, you can save up to 50% compared to new ones, making them an excellent alternative.

## 2. TOP QUALITY WITH 1 YEAR OF WARRANTY.

Our team of experts performs repairs to the **highest standards**, following a strict procedure. Every repair is consequently checked on our innovative test benches, to ensure the highest quality. Therefore, all our remanufactured parts come with **one year of warranty**.

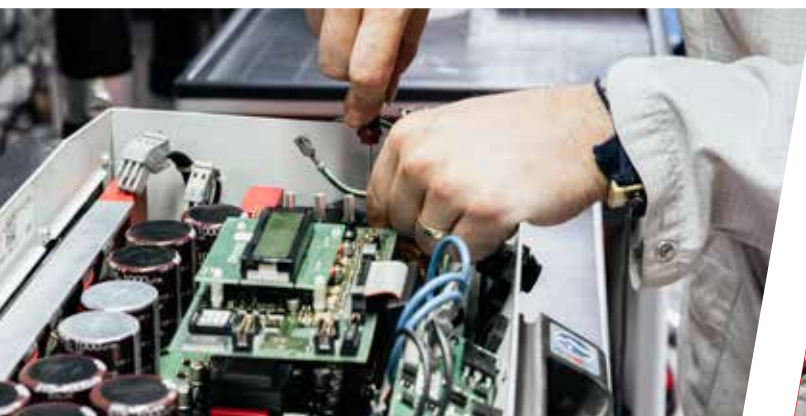

## 3. WHY? BETTER FOR THE ENVIRONMENT.

- It reduces the demand for new raw materials, conserves natural resources and promotes a more sustainable use of materials.
- It lowers energy consumption compared to manufacturing new products, contributing to reduced greenhouse gas emissions and a smaller environmental footprint.
- It minimises waste by giving used products a second life, diverting them from landfills and supporting the principles of a circular economy.

## EV CHARGERS & SOLAR INVERTERS

Solar panels and electric vehicles have become an integral part of our society. The same applies to **EV chargers** and **solar inverters**. Yet, like every electronic device, they're subject to wear and tear, or worse, damage.

Count on TVH! We **remanufacture your EV chargers and solar inverters** to make sure you enjoy the benefits of a **longer-lasting device**.

### SOLAR INVERTERS

Residential - Commercial - Industrial

### EV CHARGERS

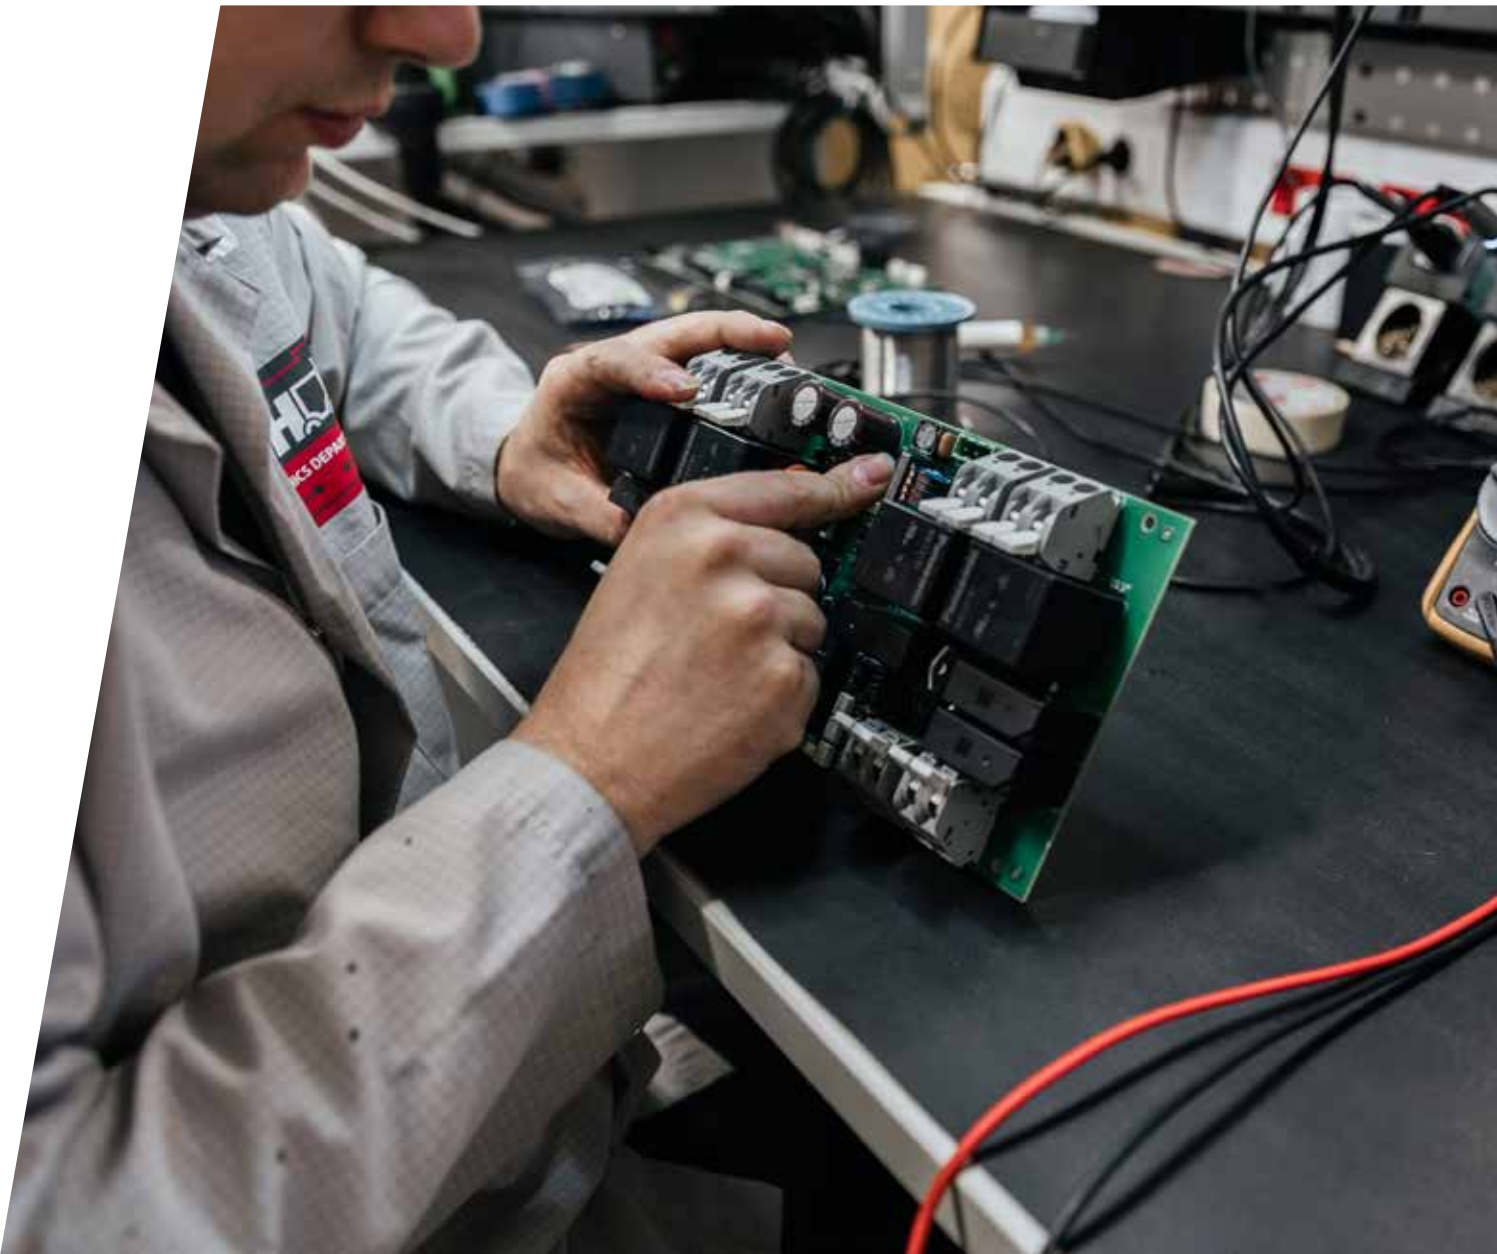

AC and DC chargers

# YOU INSTALL THEM. WE REPAIR THEM.

Our **remanufacturing services** for EV chargers and solar inverters have **numerous advantages**:

- They vastly **prolong their lifespan** by replacing wear parts before they cause problems or damage.
- They help you **save money** by preventing you from investing in a new, expensive one. Plus, you get a **a greater return on investment** by extending its lifespan.
- They are more **environmentally friendly alternatives** to purchasing a new device.
- Last but not least, our remanufacturing process results in a device that reliably performs to the best of its ability. We strongly believe in it, so every remanufactured device comes with a **1-year warranty**.

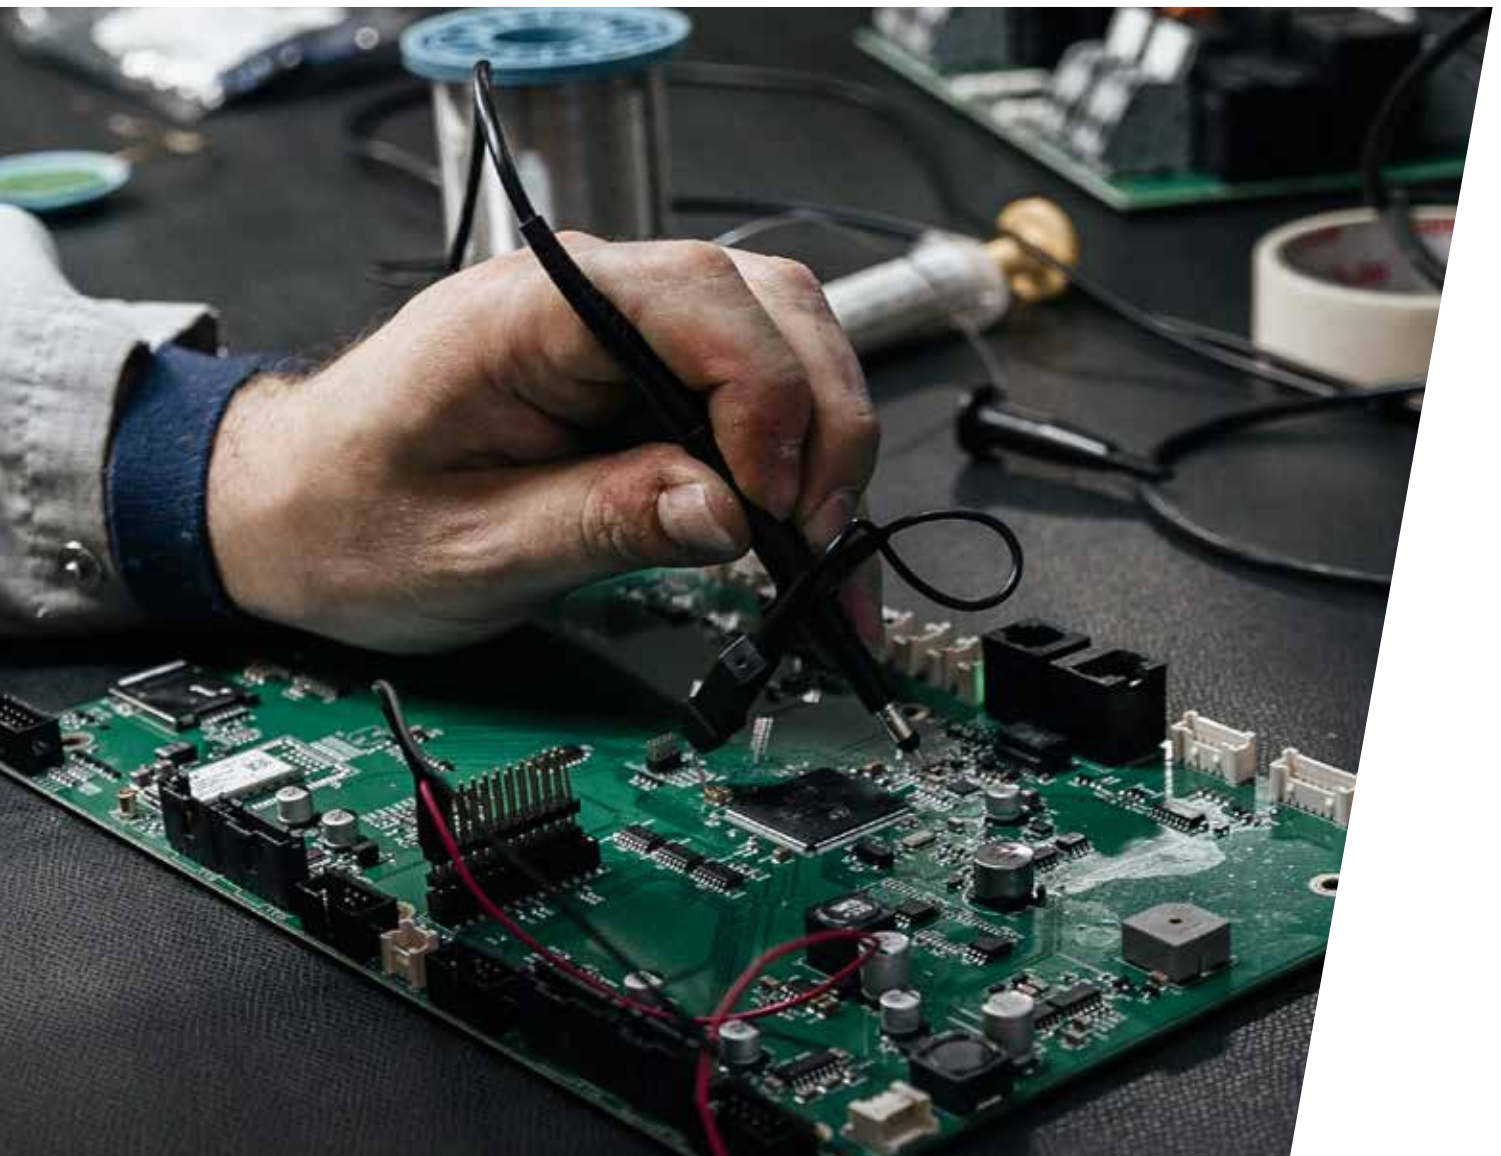

We **make sure of it**, so you can **be sure** of it.

# MAINTENANCE & REPAIR.

We offer various services to get more out of EV chargers and solar inverters:

- 1. Maintenance:** We perform preventive maintenance and replace all wear parts, bringing the solar inverter & EV charger back up to speed and prolonging its service life.
- 2. Repair:** We carefully diagnose and repair your EV chargers and solar inverters. We replace faulty components on printed circuit boards and get them back up and running.
- 3. Recycling program:** Send us your broken-down EV chargers and solar inverters! We will recycle them to be used as raw materials for new products, preventing them from ending up in landfills.

# THE SUCCESS STORY OF TVH REMANUFACTURING AT TVH ELECTRONICS.

TVH has been remanufacturing electronic parts for 30 years. What started as a small business unit in 1995 is now one of TVH's fastest-growing departments.

Our Electronics remanufacturing plant is also the biggest in Europe. Globally, our electronics department has 300 employees and remanufactures **over 100,000 parts per year**. With large service centers in Belgium and the United States, we are continuously investing in increasing our product offering, markets and reach.

## These remanufactured parts include:

Printed circuit boards - Joysticks - Battery chargers - Directional switches - Accelerators - Motor controllers - Displays - Electric motors - ...

And, since 2024, EV chargers and solar inverters.
